## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-6, 9-12, 15, 17-19, 21, 23-25, 27-28, 30-33, 35-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Urabe et al, US. Pat. No. 5,828,707.
- 3. Claims 1, 9, 15, 21, 27-28 and 35-36, Urabe teaches a data detector [title, abstract], comprising;
- a delay logic [23 and 24 of Fig. 1], receiving an unfiltered input signal in quadrature and in phase components [I(t) and q(t) of Fig. 1], and applying a delay to each of the in-phase and quadrature phase components of the unfiltered input signal [23 and 24 of Fig. 1];
- a first multiplication logic, the first multiplication logic multiplying the delayed in-phase component of the unfiltered input signal by the quadrature phase component of the unfiltered input signal to obtain a first multiplication result [first multiplier 27 of Fig. 1];
- a second multiplication logic, the second multiplication logic multiplying the delayed quadrature phase component of the unfiltered input signal by the in-phase component of the unfiltered input signal to obtain a second multiplication result [second multiplier 28 of Fig. 1]; and

Application/Control Number: 09/989,272

Art Unit: 2116

an adder, the adder adding the first multiplication result with the second multiplication result and generating a decision signal [adder 30 of Fig. 1].

- 4. Claims 2, 5-6, 12, 19, 25, 32-33, Urabe teaches wherein the delay logic comprises at least one shift registers [col. 5, lines 65-67].
- 5. Claims 3-4, 10-11, 17-18, 23-24, 30-31 and 38, Urabe teaches the delay applied by the delay logic is approximately equal to a symbol period [col. 1, lines 60-65].

## Allowable Subject Matter

6. Claims 7-8, 13-14, 16, 20, 22, 26, 29, 34, 37-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A Elamin whose telephone number is (703)305-3804. The examiner can normally be reached on MON-FRI 9:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne Browne can be reached on (703) 308-1159. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
